

Product information

U-DO Pump Series

Normal priming,
centrifugal pumps
with a double mechanical seal
Material: PVDF

SCHMITT

chemical resistant pumps

Description

U-DO Pump Series

SCHMITT

chemical resistant pumps

Normal priming centrifugal pumps
with a double mechanical seal

Application: The U-Do Pump Series is a universally applicable all-rounder. The design and manufacturing materials allow for optimized adaptability for the many different operating conditions as well as for the various media to be pumped.

Field of application: Wastewater treatment, laboratory applications, environment engineering, varnish processing operations, electro-plating technology, filtration, outside set up with fluctuating viscosities, Paper manufacturing, applications for soiled and metallicly contaminated media

Materials: PVDF (polyvinylidene fluoride)

completely dry run safe with connected seal water circle

max. output rate: 500 l/min

max. discharge head: 40 m

motor power: 0,18 - 5,5 kW

In the U-Do Pump Series, the motor power is transmitted without slip directly to the pump impeller with a rigid shaft (no magnetic coupling). A double mechanical seal (back to back) prevents the leakage of the media to be pumped and ensures the leak proof sealing of the centrifugal pump. The cooling and lubrication of the mechanical seals is carried out through a separate seal water circle.

Advantages:

- » with a connected seal water circuit (circulation system), the pump cannot be damaged through an operating error or through malfunctions in the plant (dry run safe under certain conditions).
- » applicable also for media to be pumped that do not have any lubricating properties (e.g. varnishes and paints)
- » also applicable for higher viscosities or metallic particles in the medium
- » the highest chemical resistance
- » robust, thick-walled design
- » low-maintenance through an optimal adaptation to the medium to be pumped
- » long-lasting and wear resistant, various types of designs for almost all operating conditions
- » open impeller (i.e. solids up to 3 mm grain size and 10 Vol. % possible)
- » easy to maintain (wear parts and the mechanical seal can be changed swiftly)
- » universally applicable, quiet and compact
- » various chemical resistant materials can be supplied as stock items

Types

U-DO Pump Series

SCHMITT

chemical resistant pumps

Materials and Components:

- » Main material: Parts solid made of PVDF (up to +95°C)
- » Elastomere alternatively made of FKM, EPDM, FEP or Kalrez®
- » Shafts are made of stainless steel or Hastelloy C4
- » Mechanical seals made of PTFE, ceramic, carbon or SiC
- » Structured in the designs B and C:
 - **Design B:**
The double mechanical seal is spring-loaded. The impeller is equipped with a shaft sleeve. The spring is made of Hastelloy and in contact with the medium; however, the shaft is not.
 - **Design C:**
The double mechanical seal is spring-loaded. The impeller does not have a shaft sleeve. Simple, robust structure.
- » The metal parts that are in contact with the medium (shaft sleeve, impeller insert and locking nut) are available in stainless steel or Hastelloy.
- » High-quality electric motors made in Germany

Material details:

- » **PVDF:** Polyvinylidene Fluoride, Pure, milky white, not colored (up to +95° C)
- » **FKM:** Viton® quality, -20...+200° C
- » **EPDM:** Ethylene propylene diene M-class rubber, Food-safe (FDA, KTW, WRC), -40...+160° C
- » **FEP:** Fluorinated ethylene propylene with Viton® or silicone core, -60...+200° C
- » **Kalrez®:** High performance elastomere up to +315° C
- » **PTFE:** Pure Teflon®, fiber glass or carbon fiber reinforced
- » **SiC:** Silicon carbide, without free silicon, sintered
- » **Carbon:** Carbon, impregnated with synthetic resin, food-safe
- » **Stainless steel:** 1.4571 (A4)
- » **Hastelloy C4:** 2.4610
- » **Ceramic:** Highly pure Al₂O₃-ceramic 99.7%

Types

chemical resistant pumps

Motor details:

Standard Motors (stock items):

- » Three-phase motors: 230/400 V 3ph, 50 Hz, IP 55, insulation-class F or 277/480 V 60 Hz also with PTC thermistor
- » Alternating current motors: 230 V 1ph, 50/60 Hz, IP 55, Insulation class F
- » Three-phase motors: spark arrested for combustible environments, explosion proof: EEx e IIT3

Special design models (available):

- » Three-phase motors, explosion proof, flameproof enclosure, EEx de II CT4
- » Special voltages and frequencies
- » 2-, 4- and 8-pole
- » UL and CSA execution
- » Special protection types (e.g. IP 65)
- » High temperature designs
- » Special insulation classes (e.g. tropical insulations)
- » Multi area voltage (e.g. 220-290 / 380-500 V 50 Hz; 220-332 / 380-575 V 60 Hz.)
- » Additional designs upon enquiry.

Characteristics

U-DO Pump Series

SCHMITT

chemical resistant pumps

U-DO 100 to U-DO 210 Pump Series

Motor power	» U-DO 210:	5,50 kw
	» U-DO 190:	3,00 kw
	» U-DO 170:	2,20 kw
	» U-DO 150:	1,10 kw
	» U-DO 130:	0,55 kw
	» U-DO 115:	0,25 kw
	» U-DO 100:	0,18 kw

Characteristic lines measured with water, 20° C and 2900 Rpm (50 Hz.)

Parts Descriptions

U-DO Pump series

Design C

Part-no.	Part	Materials standard	on request
01	mounting flange		
02	shaft extension	1.4571	Hastelloy C
04	impeller	PVDF	
04-2	locking nut	1.4571	Hastelloy C
05	backplate	PVDF	
05-1	inset	PvDF	
05-2	o-ring	Viton	
06	pump housing	PVDF	
26	flinging disc	rubber	
27-3	hexagon bolt	A4	
28	bolt + washer	A4	
29	cotter pin	1.4305	
30	rotating seal	carbon	SiC
31	o-ring seal	Viton	FEP or EPDM
32	coil spring	Hastelloy C	
33	stationary seal	ceramic	SiC
34	o-ring seal	Viton	FEP or EPDM
35	thrust washer	1.4571	Hastelloy C
36	pump housing seal	Viton	FEP or EPDM
37	lockwasher	A4	
39	spacer ring	1.4305	
40	hose nozzle	1.4305	
40-1	o-ring	Viton	
42-3	washer	A4	
42-4	locking washer	A4	Hastelloy C
43	hexagon nut	A4	

Design B

Part-no.	Part	Materials standard	on request
03	shaft sleeve	PTFE	
04-1	locking screw	1.4571	Hastelloy C
04-3	cap	PVDF	

Seal water - wiring diagram U-DO Pump series

for pumps with double
mechanical seal

The necessary barrier pressure can be determined after following rules:

$$P_{\text{sperr}} (\text{bar}) = H/20 \times p + 1 \text{ to } 1,5 \text{ bar}$$

$p (\text{kg/dm}^3)$ = specific gravity of the medium to be pumped

H = max. discharge head

The dimensions of the motors refer to three-phase standard motors.

Types

U-DO Pump Series

SCHMITT

chemical resistant pumps

- Motors:**
- » all driving motors are to IEC standard operating on 230/400 volts 50 cycles.
 - » single phase A.C. motors are also available up to 1,10 kW
 - » explosionproof motors can be supplied to the whole range of pumps.
 - » special voltages, frequencies and types of protection can be delivered on request.

- Note:**
- » upon request all motors can be supplied for USA standard (UL proof).
 - » for each pump also detail handouts are available.
